riting the shipping amount, how
case BOLÍVARES.

Venezuela Bolivar currency?
If the Bolivar is the currency of Venezuela Symbol:
Bs.S

Translation is done

- The user can only choose one of the four banks that appear.

BANK MERCANTIL.

BANK B.O.D.

BANK PROVINCIAL.

BANK BANESCO.

- I would like that I could enter the names of the banks and also be able to eliminate.

- with a selector you can choose the bank you want.

- The identity card, also has a selector that the user has to choose, foreign or Venezuelan, the symbol would be like this: E-C.I and V-C.I

Date 20-07-2018

Currency:
Data:

- These are the details of the submission form.

- It is also important that I can translate this data back into the form after everything is ready.

The transfer to the banks must have a way of controlling the minimum transfer and ~~maximum~~ controlled by the company administrator.

The administrator will be able to create a partner account, which will give the user th~~e~~ balance which in turn can be generated and sent by the administrator or purchased ~~from~~ the different payment gateways by default of the system .

WHAT HAPPENS BEHIND THE SOFTWARE: the transfer would be done manually. the data will be taken by copying and pasting, the important basic data are: Identity card, account number, name, and if it is current or saving. A design of how you want the location below was made

Rode:
Beneficiary's name:
Account number:
Identity card:

Currency:
Data:

- It only makes reference to the fact that these data that are attached are the important ones.

account for future shipments and it will be saved in the user's profile. For when he wants in cash money again.

All the data will be under login and only the user will be able to see it.

It is very important that the details of the transfers are easy to copy and paste so that the transfers will be manual, that is, what happens behind the web is that we will copy the details and paste them into the bank to make the transfer.

It is also important that I can translate this data back into the form after everything is ready.

It means that: We will copy the details and paste them into the bank form.

to perform the manual transfer.

that's what he means

I see, you want,

1 dollar = 65.18 Venezuelan Bolívar

1 Euro = 75 Venezuelan Bolívar

only these two currencies?

🔒 Seguro | https://canguromoney.com/dashboard

Canguro Money

1$ = 65.18 Bs.S / 1€ = 75 Bs.S

Date	Description	Status	Currency	Amount

Wallets

US Dollar   0.00 USD

Colombian peso, change to Bolívar.
Ecuadorian currency, change to Bolívar
Chilean peso, changed to Bolívar
US dollar, changed to Bolívar
Peruvian Sol changed to Bolívar
Argentine peso, changed to Bolívar
Real Brazilian, changed to Bolívar
Moneda de panama, changed to Bolívar
Euro of Spain, changed to Bolívar
Guaraní Paraguay, changed to Bolívar

- Those two coins I only put as an example I would like to be able to put more coins, the following are important.

This does not matter, it only refers to the tools that elguion already has.
